INFORS HT

Modern DDC instrumentation for all

► Comprehensive

Revamping includes not just the controller but the instrumentation, amplifiers and optionally software also.

► Bespoke

A preliminary survey allows us to say what can be done, how it will be done and provide an unbiased assessment of needs.

► Ready to go

For bench-scale projects, the X-controller system provides a DDC controller, amplifiers and even peristaltic pumps in a ready-prepared housing.

► Flexible

The revamping process can provide for future expansion by allowing simple addition of external sensors, pumps etc via an integral signal interface.

► Open to all

The revamping process is not primarily for INFORS units, many different makes and models can be accommodated.

► Specialist design

A dedicated team of engineers do this work from design to final testing, so you are assured of the best.
