

## Techfors-S The solid basis for your Pilot Fermentation

www.infors-ht.com May be subject to technical amendments

# High-Tech for an entry-level price

## All around access

Being mobile, Techfors-S can be swivelled for rapid access to the openframe components at the rear.

#### Compact

The single column design of Techfors-S makes the unit compact and capable of fitting into almost any laboratory. A steam generator can be integrated into the same footprint, if required.

#### Easy navigation

The Touchscreen controller uses tabs and a colour touch screen display for easy, intuitive navigation. Both new users and advanced operators are catered for.

### Simple yet Flexible

Techfors-S was designed to bring in-situ sterilizable systems to people new to this class of fermenter and it achieves this while allowing for expansion, re-configuration and open-frame gas mixing.

#### Low volume Specialist

The jacket of each Techfors-S vessel provides good temperature control even when low volumes are used – vital for modern fed-batch applications.

#### Specification

#### **Bacterial and Cell Version:** 151 301 or 421 TV Vessel size Sterilisation In Situ Ambiant/coolant +5 - 70 °C • Temperature Vessel types 316L; Double Jacket Speed **Bacterial Version** 20-1200 min-1 Cell Version 20-300 min-1 Vessel Seal **Bacterial Version** Mechanical seal Cell Version Magnetic coupling • Gassing options **Bacterial Version** Rotameter (options: mass flow valve and oxygene supplementation) Cell Version Rotameter and gas mix (options: mass flow valve)

Number of pumpParameters

Rotarneter (options: mass flow valve and oxygene supplementation) Rotameter and gas mix (options: mass flow valve) 3 (option: +1 pump) Temperature, speed, pH, pO<sub>2</sub>, AF, gas flow, level, pressure, weight, analog pump (e.g. feed)
